

CHINEDU MICHAEL

Frontend Developer | Web Developer

I build responsive, interactive web experiences with HTML, CSS, JavaScript, TypeScript and React, with hands-on work across e-commerce, portfolio systems, business interfaces and browser applications.

HTML5 • CSS3 • JavaScript • React • TypeScript • Responsive UI • Git/GitHub • Netlify

Eight projects. Eight pieces of evidence.

The work is presented by frontend capability rather than as interchangeable website cards. The strongest projects lead with reusable UI, e-commerce frontend work and JavaScript application logic.

01 / POW PORTFOLIO SYSTEM

Editable portfolio infrastructure

Technology: HTML5 • CSS3 • TypeScript • JavaScript

Proves: Editable UI • Product thinking • Frontend architecture

Live: <https://portfoliotemplate0.netlify.app/>

GitHub: <https://github.com/MichaelFX-1/Portfolio-Template-1>

02 / LYDIA LUXURY APPAREL

Luxury e-commerce interface

Technology: HTML5 • CSS3 • Vanilla JavaScript • GSAP/ScrollTrigger • Swiper • Three.js

Proves: E-commerce UI • Responsive design • Commerce interaction

Live: <https://lydiaapparel.netlify.app/>

GitHub: <https://github.com/MichaelFX-1/Lydia-Apparel>

03 / CHINEDU QUIZ GAME

Interactive JavaScript application

Technology: HTML5 • CSS3 • JavaScript (ES6+)

Proves: JavaScript logic • DOM interaction • State persistence

Live: <https://chineduquizgame.netlify.app/>

GitHub: <https://github.com/MichaelFX-1/Quiz-Game>

04 / CHINEDU MICHAEL PORTFOLIO

Professional identity website

Technology: React • TypeScript • Tailwind CSS • Vite • Framer Motion

Proves: React/TypeScript UI • Information architecture • Deployment

Live: <https://chinedumichael.netlify.app/>

GitHub: <https://github.com/MichaelFX-1/Chinedu-Michael-Portfolio>

Selected work

05 / YHUDEE COLLECTION

Luxury retail storefront

Technology: HTML5 • CSS3 • Vanilla JavaScript • localStorage • Canvas API

Proves: E-commerce logic • Product catalogue • Responsive UI

Live: <https://yhudeecollection.netlify.app/>

GitHub: <https://github.com/MichaelFX-1/Yhudee-Empire>

06 / SAGE ARTS

Business services platform

Technology: HTML5 • CSS3 • JavaScript • Intersection Observer • localStorage

Proves: Business UX • Service presentation • Enquiry flow

Live: <https://sageartcollection.netlify.app/>

GitHub: <https://github.com/MichaelFX-1/Sage-Arts>

07 / KULVIX PROJECT

Corporate / portfolio web template

Technology: HTML5 • CSS3

Proves: Corporate UI • Information hierarchy • Responsive layout

Live: <https://kulvixproject.netlify.app/>

GitHub: <https://github.com/MichaelFX-1/Project>

08 / POW PORTFOLIO TEMPLATE 2

Portfolio system iteration

Technology: HTML5 • CSS3 • TypeScript • JavaScript

Proves: TypeScript data modelling • Editable UI • Motion

Live: [\[No live deployment provided\]](#)

GitHub: <https://github.com/MichaelFX-1/Portfolio-Template-2>

Use case → implementation → evidence

01 / POW PORTFOLIO SYSTEM

[Editable portfolio infrastructure](#)

USE CASE

A reusable portfolio template designed to let users present professional information and project work without building a portfolio from scratch.

MY ROLE

Frontend implementation of the editable interface, responsive layouts and interaction system.

KEY FEATURES

- Inline portfolio editing
- Light / white / dark themes
- Accent color customization
- JSON import / export
- localStorage persistence
- 3D / parallax presentation

TECHNICAL FOCUS

Typed portfolio data, DOM-driven editing, browser persistence and reusable presentation patterns.

CHALLENGE

Managing editable portfolio data and UI state without a backend while keeping the template easy to use.

HOW I SOLVED IT

Used a structured portfolio data model, localStorage persistence and import/export workflows so users can edit, save and transfer portfolio data directly in the browser.

RESULT

A reusable, deployable portfolio system with a working editing and persistence workflow.

LIVE: <https://portfoliotemplate0.netlify.app/>

GITHUB: <https://github.com/MichaelFX-1/Portfolio-Template-1>

02 / LYDIA LUXURY APPAREL

[Luxury e-commerce interface](#)

USE CASE

A premium fashion-fabric storefront focused on product discovery, visual storytelling and direct customer enquiry.

MY ROLE

Frontend implementation of the storefront, responsive layouts, product interactions and commerce-oriented UI.

KEY FEATURES

- Product catalogue and detail views
- Shopping-bag state
- Theme switching
- WhatsApp ordering
- Interactive motion and 3D presentation
- Responsive mobile navigation

TECHNICAL FOCUS

DOM-driven rendering, browser state, responsive UI, animation and customer-facing commerce interactions.

CHALLENGE

Combining a visually rich luxury presentation with functional product and shopping interactions across screen sizes.

HOW I SOLVED IT

Separated product data from rendering logic, managed cart state in JavaScript, persisted theme state with localStorage and used responsive CSS plus browser interaction APIs.

LIVE: <https://lydiaapparel.netlify.app/>

GITHUB: <https://github.com/MichaelFX-1/Lydia-Apparel>

Implementation and evidence

03 / CHINEDU QUIZ GAME

[Interactive JavaScript application](#)

USE CASE

A browser quiz application that manages questions, timing, user responses and scoring.

MY ROLE

Frontend implementation of the quiz interface and application logic.

KEY FEATURES

- Timed quiz flow
- Shuffled questions
- Previous / next navigation
- Answer state tracking
- Score calculation and feedback
- Saved progress / auto-resume

TECHNICAL FOCUS

JavaScript state management, event handling, DOM rendering and localStorage persistence.

CHALLENGE

Keeping the timer, selected answers, question navigation and final score synchronized.

HOW I SOLVED IT

Centralized quiz state, persisted active state in localStorage and re-rendered the question interface from the current state.

LIVE: <https://chineduquizgame.netlify.app/>

GITHUB: <https://github.com/MichaelFX-1/Quiz-Game>

Implementation and evidence

04 / CHINEDU MICHAEL PORTFOLIO

[Professional identity website](#)

USE CASE

A central recruiter-facing platform for presenting development work, technical skills, experience and contact information.

MY ROLE

Frontend implementation of the current portfolio application, responsive layouts, project presentation and interaction.

KEY FEATURES

- Project showcase architecture
- Responsive navigation
- Experience and skills presentation
- Contact flow
- Animated UI interactions
- Netlify deployment

TECHNICAL FOCUS

Component-based frontend development, responsive UI, recruiter-focused information architecture and modern frontend tooling.

CHALLENGE

Presenting projects and professional information clearly while keeping the site focused on frontend evidence.

HOW I SOLVED IT

Structured the site around work, skills, experience and contact, using reusable UI sections and responsive layout patterns.

LIVE: <https://chinedumichael.netlify.app/>

GITHUB: <https://github.com/MichaelFX-1/Chinedu-Michael-Portfolio>

05 / YHUDEE COLLECTION

[Luxury retail storefront](#)

USE CASE

A luxury e-commerce experience for timepieces, jewelry and accessories, designed around a long-form digital showroom.

MY ROLE

Frontend implementation of the storefront, catalogue interactions, shopping-bag behaviour and responsive presentation.

KEY FEATURES

- 47-product catalogue
- Search and category filtering
- Sorting by price and name
- Persistent shopping bag
- Pricing and gift-wrap calculations
- WhatsApp / email checkout
- Dark / light theme persistence

TECHNICAL FOCUS

JavaScript state management, dynamic rendering, localStorage, responsive CSS, browser APIs and commerce logic.

CHALLENGE

Delivering a complete front-end shopping journey without introducing a framework or backend.

HOW I SOLVED IT

Separated product data, application state and UI rendering; used localStorage for persistence and generated customer-ready WhatsApp/email order messages.

RESULT

A polished static commerce prototype demonstrating practical UI engineering and product-oriented frontend logic.

LIVE: <https://yhudeecollection.netlify.app/>

GITHUB: <https://github.com/MichaelFX-1/Yhudee-Empire>

Implementation and evidence

06 / SAGE ARTS

Business services platform

USE CASE

A commercial service website presenting signage, portraits, branding, printing and merchandise services with a clear path to enquiry.

MY ROLE

Frontend implementation of service presentation, portfolio interactions, responsive navigation and contact experience.

KEY FEATURES

- Service catalogue
- Portfolio filtering
- Five-step process section
- Quote/contact form
- Theme switching
- Responsive interactions and reveal animations

TECHNICAL FOCUS

Information architecture, dynamic rendering, responsive layout, interaction states and enquiry-oriented UX.

CHALLENGE

Communicating many creative services without making the site difficult to scan.

HOW I SOLVED IT

Grouped services and portfolio work into clear sections, used filtering and progressive reveal interactions, and provided direct quote/contact actions.

LIVE: <https://sageartcollection.netlify.app/>

GITHUB: <https://github.com/MichaelFX-1/Sage-Arts>

Implementation and evidence

07 / KULVIX PROJECT

[Corporate / portfolio web template](#)

USE CASE

A responsive professional template focused on structured presentation of projects, profile information and contact options.

MY ROLE

Frontend implementation of the page structure, responsive layout and visual presentation.

KEY FEATURES

- Responsive hero section
- Project showcase
- About and profile sections
- Contact flow
- Mobile-friendly navigation

TECHNICAL FOCUS

Semantic HTML structure, CSS layout, responsive presentation and information hierarchy.

CHALLENGE

Creating a clean, professional interface from a simple template structure while keeping content easy to scan.

HOW I SOLVED IT

Used structured sections, responsive CSS and clear navigation patterns to separate identity, work and contact content.

LIVE: <https://kulvixproject.netlify.app/>

GITHUB: <https://github.com/MichaelFX-1/Project>

Implementation and evidence

08 / POW PORTFOLIO TEMPLATE 2

[Portfolio system iteration](#)

USE CASE

A second POW template iteration exploring a more playful, editable portfolio experience.

MY ROLE

Frontend implementation of the typed data layer, interface behaviour and presentation system.

KEY FEATURES

- Typed portfolio data model
- Editable content structure
- Theme controls
- Import / export workflow
- 3D scene and motion effects
- Zero-build browser runtime

TECHNICAL FOCUS

TypeScript data modelling, DOM-driven runtime behaviour and reusable portfolio presentation.

CHALLENGE

Keeping the second template consistent and editable while supporting richer visual interactions.

HOW I SOLVED IT

Defined a typed PortfolioData model, compiled TypeScript to browser-ready JavaScript and kept the runtime dependency-light.

[LIVE: \[No live deployment provided\]](#)

GITHUB: <https://github.com/MichaelFX-1/Portfolio-Template-2>

Technical practice behind the projects

RESPONSIVE UI

Responsive layouts built around CSS Grid, Flexbox, fluid spacing and breakpoint-aware navigation across e-commerce, business and portfolio interfaces.

JAVASCRIPT APPLICATION LOGIC

Hands-on browser logic including event handling, DOM rendering, filtering, sorting, timers, scoring, shopping-bag state, localStorage persistence and dynamic content.

REACT + TYPESCRIPT

Current portfolio work uses React and TypeScript with a modern component-oriented frontend workflow; POW template work also demonstrates typed TypeScript data modelling.

API / INTEGRATION

Practical frontend experience integrating API/REST-oriented workflows and application interfaces; current industry exposure includes login, transportation and tracking workflows.

ACCESSIBILITY

Accessibility-conscious UI work includes semantic markup, descriptive image text, labelled controls, responsive touch layouts and keyboard-friendly interaction patterns where implemented.

TESTING & DEBUGGING

Chrome DevTools, browser testing and interface debugging are part of the development workflow, with testing used to verify responsive behaviour and interactive states.

DEPLOYMENT

Live deployments include Netlify-hosted frontend projects and the current portfolio. Git/GitHub are used for source control and project review.

The portfolio itself is a modern frontend build

BUILDING WITH

React • TypeScript • Vite • Tailwind CSS • Framer Motion

CORE FOUNDATION

HTML5 • CSS3 • JavaScript (ES6+) • CSS Grid • Flexbox • DOM

WORKFLOW

Git • GitHub • Chrome DevTools • VS Code • Netlify

PROJECT EVIDENCE

E-commerce • Business UI • Portfolio systems • JavaScript applications

WHAT I BUILD

Responsive interfaces, interactive browser applications, e-commerce interfaces, business websites and reusable UI systems.

Professional context

KULVIX

Frontend Developer & Instructor (Intern)

Jan 2026 – Present

Contribute to frontend development and build responsive interfaces while tutoring beginner developers in HTML, CSS and JavaScript. Built and deployed a responsive capstone project and continue developing practical React, TypeScript and UI skills.

POW / PROOF OF WORK

Frontend Developer / Web Developer

Mar 2026

Developed two editable portfolio-template systems with reusable interface patterns, browser persistence, theme controls and portfolio data workflows.

DELIVER-NOW

Frontend Developer / Web Developer

May 2026

Contribute to UI and TypeScript frontend workflows for mineral transportation and logistics, including login, tracking, batch and equipment-audit interfaces.

PERCORSOTECH

Frontend Development Intern / Learner

Sep 2025 – Nov 2025

Built foundational web-development skills through practical HTML, CSS and JavaScript work and exposure to software-development workflows.

INDUSTRY EXPOSURE

Web development services • Technology education • Portfolio infrastructure • Logistics and mineral-transportation systems • UI/UX and frontend product work

A frontend developer building from fundamentals

I'm Chinedu Michael, a frontend developer focused on building responsive and interactive web interfaces. My foundation is in HTML, CSS and JavaScript, with hands-on work across e-commerce interfaces, business websites, portfolio systems and browser applications. I also build with React and TypeScript and use Figma for interface design and prototyping.

My project portfolio is intentionally varied: retail interfaces, service-business websites, reusable portfolio systems, interactive JavaScript applications and a modern React/TypeScript portfolio. Each project is intended to provide different frontend evidence.
